PROFILE

Senior software developer with 5+ years building web apps and games across professional roles and independent projects. Promoted from Junior to Middle at A-Team Global. Built React and TypeScript interfaces for enterprise projects, including two started from scratch as the sole frontend developer. Recent independent work includes a deployed polling app and a game released on Steam.

EXPERIENCE

Independent Projects | Software development | 2023–Present

- Focused on independent projects while deepening game development and AI skills; released a Rust/Bevy game on Steam and deployed an AI-assisted polling app.

A-Team Global (formerly IT Master Soft) | Web Developer, promoted from Junior to Middle | 2019–2023

- Built the frontend from scratch as the sole frontend developer for an internal Volkswagen VR training platform used to teach engineers how vehicle systems work (React, TypeScript).
- Built a climate-control administration dashboard for commercial buildings, starting the frontend from scratch as the sole frontend developer (React, TypeScript, GraphQL).
- Maintained and extended BAS Trucks' legacy website and online stores in PHP/Zend Framework, JavaScript and jQuery; worked with third-party APIs and legacy code.

BestWebSoft | PHP Developer | 2019

- Developed and maintained PHP-based WordPress plugins.

SELECTED PROJECTS

Concord | *Polling app — SolidJS, TypeScript, Cloudflare Workers*

Designed and deployed an accountless polling app that turns free-text answers into organized results. Jev, TypeSafe's structured-decision model, matches responses by intent; Workers AI generates concise group labels.

Last Bottle | *Game — Rust, Bevy — Released on Steam*

Took an original single-player game from concept to Steam release in Rust and Bevy, handling design, gameplay, menus, packaging, and store setup.

Sudoku | *Web app — SolidJS, TypeScript*

Built an installable Sudoku PWA with a custom canvas renderer and touch controls. Puzzle generation and hints run in Web Workers so they do not block interaction.

SKILLS

Frontend: React, TypeScript, SolidJS, Redux, Sass, Tailwind CSS

Backend & APIs: Node.js, PHP (Laravel, Zend Framework), REST, GraphQL, WebSockets

Data: SQL, relational data modeling, Firebase, PocketBase

Tools: Git, Vite, Cloudflare Workers

EDUCATION

Zaporizhzhia National University — Software Engineering studies, 2017–2019 (two years; degree not completed)

LANGUAGES

Russian, Ukrainian (native); English (C1)
